Qualitäts-, Umwelt- und Sicherheitspolitik FOLIEN FISCHER AG

Quality, Environmental and Security policy

Our policy is to optimise customer satisfaction and to comply with all laws and regulations to protect both people and the environment. The company's policy of protection and security of the environment, safety and health matters guarantee the quality of our products and services and contribute to our efforts in minimising any pollution of our natural resources.

Our customers set the benchmark for quality so their judgement is crucial in its determination. In addition, our everyday objective is to contribute to the protection of our environment against damaging influences. In all that we do all our employees support these policy aims and objectives and all our activities in this respect are continuously planned, checked and monitored.

Environmental and security issues are fully integrated in our decision processes and management systems.

Therefore we comply with those quality, environmental and security standards set by our customers and by specifications and instructions.

The dedication of all our employees and a continuous process improvement (CPI) to the quality of our products and services mean that our aims for quality of our products and services, environmental protection and safety at work issues are being continuously increased.

We understand that the protection of the environment is an integral part of the executive function. Therefore our management sets the example in these matters. Everyone at Folien Fischer AG share the responsibility for quality, environmental protection and security.

The quality, environmental and security policy is regularly and continually discussed and improved upon.
